

# The Simple Truth about Egg-Shaped Cars

Did William Branham simply describe this picture published in Newsweek Magazine on December 17, **1956**?

**William Branham said that he wrote the prophecy down in 1933:**

I've got that wrote in a book since 1933.  
August 5, 1960

**Before 1958 the prophecy was only about an egg-shaped car:**

They'll look like an egg.  
March 26, 1953

**From 1958 onward the prophecy was about remote controlled cars:**

It's them cars they're bringing out right now, remote control, for safety.  
August 5, 1960

**He said it was fulfilled in the past:**

They got that thing perfected right now.  
January 28, 1961

And the company's here that's already ordered them.  
August 23, 1964

**And the Church Ages book doesn't mention the egg shape:**

"...a plastic bubble-topped car that was running down beautiful highways under remote control."
